

PET COOLING MATS

Pet Cooling Mats are made of non-toxic cooling materials, and safe for your pets to stay on for as long as they'd like. They use gels to absorb heat from your pet's body and provide your pet with cooling comfort for up to several hours, then automatically reset after several minutes of non-use. There are many different styles and sizes to choose. The cooling mats are designed to use a lightweight, portable and puncture resistant material. They're easy to move around and travel with your family, placing them in your car, dog crate or any outdoor area. They can help your beloved pet relax and enjoy the summer.

Features :

- Safe, non-toxic and durable material
- Cooling last up to several hours
- Quickly chilling after non-use
- Convenient to carry
- Easy to clean
